**THE MOST PROFESSIONAL
PROOFING MESH NETTING FACTORY
SINCE 1997.**

Anti-Insect Netting, Anti-Hail Nets,
Tree Protection Bag& Crop Cover Fabric, etc.

COMPANY INTRODUCTION

GEZI screen mesh factory is one of the lead manufacture and exporter of all kinds of mesh netting products in China. We're concentrated in the production of HDPE anti-insect and hail mesh netting, fruit tree protect bag, drape nets, agriculture crop cover fabric etc.

GEZI all mesh products have passed Quality Management System ISO 9001 :2008. We also have complete factory inspection report, no silicon certificate, 100% nylon or polyester material certificate, mesh aperture size certificate and SGS etc.

Countries USA, UK, Canada, Mexico, Spain, Pakistan, Thailand, Malaysia, Australia, Egypt, India, Brazil,etc. are main exporters of us at present.

GEZI is serving for wholesalers, dealers, trading companies& end users of mesh netting. We have own factory workshops with looms, with research and testing center.

GEZI mesh netting are mainly used in anti-insect netting, anti- hail netting, wind proof net, agriculture netting , greenhouse netting, horticultural netting, , plastic mesh net, fruit tree protect net's bag, fruit tree protection drape nets and crop cover fabric etc.

GEZI GROUP team's mission is: Best quality and price products speak louder than anything!

We're focus on abroad OEM cooperation.

Material:

High Density Polyethylene (HDPE).

Application:

Agricultural Crop Cover Protect Netting, Greenhouse Protect Mesh, Fruit Tree Protection Drape Net, Tree Protect Net's Bag etc.

Features:

- Stabilized UV that guarantees a long durability.
- Very tight fabric.
- High tenacity and transparency.
- Permeable to the passage of air and water.
- Mesh Count: 10X8, 20X17, 30X20, 40X25, 50x25.
- Width and Length size are all customized.
- Grammage: 40-130g/m2

Superiority :

Reduce the spread of pests and viruses, increase the yield of agricultural products, increase industrial efficiency.
 Reduce the use of pesticides to ensure the green and environmental protection of agricultural products.
 Compared with plastic greenhouse, insect net greenhouse more easily ventilated, by light, heat dissipation, and has the effect of moisture insulation.
 To a certain extent, it can resist natural disasters, such as strong storms, storms and sand storms, and prevent the destruction of agricultural products and the production reduction.

Mesh	Standard Mesh	WireDiameter (mm)	Weight (g/m2)	Width (m)	Length (m)	Color
20	20x17	0.15	30	As your demand	100/200	As your demand
	20x17	0.21	60			
30	30x20	0.15	40			
	30x20	0.21	80			
40	40x25	0.15	50			
	40x25	0.21	110			
50	50x25	0.15	60			
	50x25	0.19	100			
	50x25	0.21	125			

Material:

High Density Polyethylene (HDPE).

Application:

Prevent Hail Netting, Rain And Snow Proof Nets, Anti-Birds Netting, Proof Wind Nets and Greenhouse Protect Mesh etc.

Features:

Stabilized UV that guarantees a long durability.

Permeable to the passage of air and water.

Mesh Count: 4x8, 4x9, 4x10, 4x11, 5x11, 8x11 etc.

Width and Length size are all customized.

GSM: 40-80g/m2

Main color: Crystal

Superiority :

- High strength, little difference in vertical and horizontal strength.
- Acid and alkali resistance, non-toxic, no radiation, harmless to human physiology.
- Excellent air permeability.
- Master batch dyeing, never fade.
- Heat preservation, moisture, anti-freeze, anti-frost, anti-insect, anti-grass.
- Reduce uv exposure.
- Improve production efficiency and plant quality.

Standard Mesh	Hole Size (mm)	Wire Diameter (mm)	Weight (g/m2)	Width (m)	Length (m)
4x8	7*4	0.25	40	2-4m	100/200m
4x9	7*3	0.25	45		
4x10	7*2.8	0.25	50		
4x11	7*2.2	0.25	55		
5x11	5.1*2.2	0.25	65		
8x11	3.5*2.2	0.25	70		
3x8	8.5*2.9	0.35	65		

- ✔ Made of high quality transparent mesh, 100% nylon or 100% HDPE with ventilated, breathable, reusable.
 - ✔ Perfect for Plant size 6"x10", 12 inch x 8 inch, 10 inch x 14 inch etc.
 - ✔ With rope on the edge, easy to install and provide a well protection
 - ✔ Can be used in the all growing season
 - ✔ This garden netting bag is non-toxic, can be reusable and for Safe and effective barrier excludes -Many types of pests, including insects, birds and animals
 - ✔ It can be used in the all growing season. It can be used to pack plant seed or storage other little things.
 - ✔ The fabric feels soft, comfortable, elastic, and cut very large
 - ✔ Safe, effective barriers do not include a variety of pests, including insects, birds and animals
- Fine knit tulle, extra protection

HIGH QUALITY HDPE MATERIAL TREE PROOF BAG	6 inch x 10inch
	12 inch x 8 inch
	10 inch x 14 inch
	22 inch x 14 inch
	37 inch x 24 inch
	55 inch x 41 inch

Hex Net Popular applications:

Cherry, apple, pear, fig and other fruit tree netting, berry patch and garden netting.

Hex Net is the answer to protect individual fruit and nut trees or berry patches. Made super-strong and durable, GEZI hex mesh design is our strongest seasonal net and is snap to install to ensure your hard-earned harvest becomes a reality. This kind netting is white in color to achieve enhanced fruit quality especially in conditions where nearby structures or large trees partially limit sunlight needed for ripening.

Fruit Saver is a tent-shaped net providing natural protection for fruit trees, against birds, bats, possums, rodents and insects, including fruit fly.

Environmentally friendly, it avoids wasting money on harmful chemical sprays, bird scarers, ultrasonic devices or baits.

Fruit Saver is ideal for organic fruit production.

Fruit Saver is made from white, UV-stabilised HDPE, woven monofilament 2mm netting. Small mesh and 15% shade factor help guard against hail, wind and sunburn damage, while providing sufficient light and airflow for healthy fruit production. Fruit Saver is suitable for most fruit trees including stone fruit, apples, figs, guavas, pears, persimmons and citrus. Keep trees pruned to a manageable size.

With care, your Fruit Saver net will last many seasons. Fruit Saver is wildlife friendly due to its white colour and small mesh-size which prevents birds and animals from becoming snagged.

HIGH QUALITY HDPE MATERIAL TREE PROOF BAG	6 inch x 10inch
	12 inch x 8 inch
	10 inch x 14 inch
	22 inch x 14 inch
	37 inch x 24 inch
	55 inch x 41 inch

Reinforced Edge(Double Color Lines)

Advanced Equipment can make Super Large Width Up To 45m

Joint By Different Colors By Customers' Grammage

Packed With Paper Tube Inside And Poly Bag Outside

Non woven fabric used as a covering material for garden, protection material from agriculture vermin, heavy rain, hail rain, over heating.

Plants covered with non woven fabrics can be fertilized afterwards required.

Non woven spun bonded mesh fabric and non-woven UV resistant polypropylene fleece.

Non woven fabrics are preferred for frost covers:

Lightweight, breathable and those which dry quickly are used.

These fabrics should provide open spaces for crop treatments.

Adverse effects of frost:

Frost can kill the seeds and adversely affect the ariel portion of the plant.

Frost makes the plant loose its moisture and dry out.

Usage-Agriculture:

Green house cover

Fruit cover

Weed cover

Seedbed

Frost Covering:

Minimized moisture and heat loss. Keeps the plant warm and healthy.

Crop cover specification:

GSM: from 10 to 17

Width: 1.6-3.2m

UV protected

Fruit cover specification:

GSM: from 17 to 25

Width: 7-30m

UV protected

Is your raw material the new and virgin HDPE ?

Yes, all our netting are 100% virgin HDPE material.

If you need the certificate, we can specially do SGS authoritative test certification for your order, it mainly including: raw material, UV content test, heat stability test.

How long is the average service life of your nets?

According to the different UV content and specific use of the temperature difference, climate conditions, if the UV content is 3%, under normal weather and use, the service life is generally about 3 years, UV content of 5%, under normal use, the service life can reach 5 years or more.

Are your nets reusable?

Yes, after you use it, clean the nets and store it in a cool warehouse for the next year and increases the lifetime of the net.

What's the KLY of your nets?

GEZI netting KLY is 450-850.
